Cary North Carolina

PROFESSIONAL SUMMARY

Healthcare informatics and business transformation professional with nearly eight years of progressive leadership experience leading operational improvement, process redesign, governance initiatives, and multidisciplinary collaboration within complex public-sector organizations. Recently completed a Master of Science in Health Informatics, combining leadership experience with expertise in healthcare analytics, health information systems, data visualization, and evidence-based decision-making. Demonstrated success delivering large-scale transformation programs, designing operational frameworks, developing performance measures, and improving organizational efficiency through data-driven analysis. Passionate about applying health informatics, operational excellence, and emerging technologies to improve healthcare delivery, optimize workflows, and support better patient and organizational outcomes.

CORE COMPETENCIES

- Healthcare Informatics & Analytics
- Data Visualization
- Business Transformation
- Operational Excellence
- Process Improvement
- Workflow Optimization
- Change Management
- Quality Improvement
- KPI Development
- Executive Reporting
- Governance Support
- Leadership
- Cross-functional Collaboration
- Stakeholder Engagement

Franklin University

Columbus, OH • Expected in 08/2026

Master of Science: Health Informatics

- 3.6 GPA - predicted

Henley Business School

United Kingdom • 02/2025

Associate of Arts: Business Management

Employer Sponsored

The Open University

United Kingdom • 06/2021

Bachelor of Arts : Psychology & Criminology

measures to ensure effective nationwide implementation.

- Led recruitment, onboarding, coaching, and performance management of a team of nine Case Managers during organization-wide transformation.
- Facilitated collaboration between judges, healthcare professionals, legal representatives, probation services, policy teams, and senior leadership.
- Produced executive briefings, dashboards, operational reports, and strategic recommendations to support evidence-based decision-making.

The Parole Board for England and Wales - Ministry of Justice - Case Manager (Business Process Improvement)

London, UK • 06/2020 - 04/2022

- Designed and implemented the 10-Day Hearing Readiness Initiative following analysis of more than 180 complex cases, reducing avoidable hearing delays through proactive quality assurance.
- Managed complex parole reviews involving multidisciplinary stakeholders including judges, psychologists, psychiatrists, healthcare providers, probation officers, legal representatives, prison staff, and victims' services.
- Coordinated preparation and review of risk assessments, clinical reports, and statutory documentation, facilitating informed decision-making.
- Built collaborative partnerships across multiple agencies, enhancing communication and resolving operational challenges in service delivery.
- Produced executive briefing materials and case analyses, providing recommendations that informed governance and operational decision-making.
- Maintained exceptional standards of accuracy, confidentiality, and professionalism while managing competing priorities in a highly regulated environment.

PROFESSIONAL MEMBERSHIPS

- American Health Information Management Association (AHIMA)
- American Medical Informatics Association (AMIA)

FEATURED PROJECTS

VA Veteran Mortality Analytics (2026)

Master of Science in Health Informatics Capstone Project

- Conducted a comparative analysis of mortality patterns among Recent Veterans Health Administration (VHA) Users and Other Veterans using publicly available U.S. Department of Veterans Affairs data (2018-2023).
- Applied descriptive analytics, trend analysis, and Years of Potential Life Lost (YPLL) to support evidence-based healthcare planning.
- Developed a complete GitHub repository including technical documentation, Jupyter Notebook, visualizations, presentation, and project report.

Technologies: Python, Pandas, Matplotlib, Jupyter, Notebook, Microsoft Excel, GitHub
